CHRIST CHURCH, CARBON

Rev. G.B. Hotchkis, B.A., Lth.
Organist, Mr. Hugh Isaac

Evensong at 7:30 p.m.
Sunday, June 22nd

Church School every Satur-
day at 2:30 p.m.

Mr. Don Pattison spent the weekend at his home.

Mrs. Les Saunders and Shirley spent the day at Calgary Wednesday of this week.

Mr. Bill Pickerill and son, Donny are visiting at the home of Mr. and Mrs. Norman Nash.

Mr. and Mrs. Jack Barr and Dennis motored to Trochu on Monday and took in the horse show.

The Junior Ladies Aid held a Theatre Party Monday evening, motoring to Trochu, and after the show were the guests of Mrs. Freddy Adams.

Mr. and Mrs. Stan Torrance and Mr. and Mrs. A.J. McLeod motored to Lacombe Sunday and spent the day at the home of Mr. and Mrs. W. Douglas.

If you haven't already attended the Big Anniversary Sale at Carbon Trading Co. take a gander at the list of bargains on the back page of this issue.

Several people went fishing on Sunday and report a wonderful catch.

We wish to offer a vote of thanks to all members of the Canadian Legion for the splendid picnic on Sunday which was so capably handled and enjoyed by all, and the treats given the children by all who were there.

About a dozen shotgun enthusiasts were present for the regular trap shoot on the evening of June 4. No one has shot a perfect score yet so that just means that the rest of you sportsmen had better come along and practise with the rest of us for the annual trophy shoot which will be held this year on July 16. Remember there is shooting every first and third Wednesday of each month. Say, if you haven't joined the Fish and Game Association yet, you'd better see Wray Wright. He'll write your name down so fast you'll think you were always a member and it will only cost you \$2.50 a year.

MRS. VERA MALTON

Rev. D.B. Houghton conducted funeral services for Mrs. Vera Malton of West Summerland, B.C. in Jacques Funeral Home, Calgary on Tuesday at 4 p.m. Mrs. Malton died Friday after a lengthy illness.

A former Carbon resident, she was born in Dresden, Ont. and moved to Empress, Alberta in 1913 where she lived for six years before moving to Swallow. In 1922 she moved to Carbon, living here until moving to Calgary in 1936. She moved to the Coast in 1938 and for the past two years she had lived in West Summerland. She was a member of the I.O.D.E.

Surviving are her husband, George W. of West Summerland; a daughter, Mrs. James Wrong of Spence's Bridge, B.C.; a grandson; a sister, Mrs. H.C. Willson of Strathmore; and a brother, Garnet G. Peters of Drumheller. A son, Flying Officer Samuel Malton, was killed overseas in the last war.

The I.O.D.E. Rose Ball will be held June 27th in the Carbon Scout Hall.

Mrs. John Craddock and daughter are spending a few days at the home of Mr. and Mrs. Sid Wright.

Mr. and Mrs. Norman Nash and Mr. Bill Pickerill and Donny are spending a couple of days visiting friends at Stettin.

We appreciate notes on the activities of any local organization which may be handed to Mrs. Hunt or mailed to George Wheeler, Acme.

John Leiske had the misfortune of crushing his thumb with the blow of a hammer on May 25 and it required a few stitches. The stitches were removed and the thumb is improving rapidly.

Swallow Sports will be held June 18th. The baseball tournament will feature Carbon, Acme, Three Hills and Swallow.

Discoveries Near Flin Flon May Shed Light On History

FLIN FLON, Man.—Two discoveries made near here may shed additional light on the early history of northern Manitoba and Saskatchewan. The first find was made last fall when Frank Otaway, natural resources field officer here until a few weeks ago, uncovered an old camp site on the shore of Beaver lake, southwest of Flin Flon.

The second discovery was made recently when 69-year-old Errol Ford dug an ancient rifle barrel from the shore of Athapuskow lake, southwest of here.

The location of the camp site on Beaver lake has not been revealed by the Saskatchewan government authorities in order that the area may be fully investigated before being disturbed by the general public. It is believed to be on the east shore of the lake within easy reach of No. 35 highway.

According to reports square mounds show where cabins were located and in the corner of the mounds are heaps of rocks that once formed fireplaces. Near the locations are several depressions in the ground that indicate canoes were buried underground to save them from the winter's frost.

Although nothing definite can be obtained, it is reported five cabin sites have been located.

Old Time Car Is In Running Form And Ready For Sale

COCHRANE, Alta.—Note to Jack Benny: for sale—one 1900 Maxwell. Kenneth Cohoe, a mechanic here, has reclaimed the old horseless carriage from a pile of junk and is willing to sell it to the radio comedian, or any other buyer, for a good price.

The Maxwell, probably the oldest car ever advertised for sale in Canada, was found in an abandoned shed on a ranch near here, where it had been stored for 30 years.

The body was shabby and the engine had fallen out in pieces. Cohoe bought it for \$10 and restored it to running order after several months of hard work.

Powered by a two-cylinder engine, it has all the accoutrements of the earliest automobiles—carbide lamps, brass-bound radiator and tool box in the back. Top performance is about 15 miles an hour.

The owner is unsure of the car's actual age but he thinks it's somewhere between 1900 and 1906. Patents on parts of the car were registered in 1895. Aware of the value of such a museum piece, Mr. Cohoe hopes to realize about \$2,000 from his work.

SLEEP TO-NITE

SEDICIN tablets taken according to directions is a safe way to induce sleep or quiet the nerves when tense. \$1.00 Drug Stores only! or Sedicin, Toronto 2.

RID YOURSELF OF Cigarette Addiction

PEGGY

—By Chuck Thurston

Further exploration is expected to be carried out this summer.

Levelling the ground on the front of a summer camp lot at Blondie's beach recently, Mr. Ford suddenly struck something solid with his shovel. Digging away six inches of earth he lifted out a rusted rifle barrel.

The barrel was 40½ inches long, very rusty and bent. It appeared to be a flintlock gun described as those in use about the middle of the 19th century and is believed to have been made before 1850.

The gun appears to have been discharged by igniting powder by use of flint. A small hole about a half inch from the breach was used to place the powder behind the bullet and this was ignited when the hammer struck a piece of flint.

Funny and Otherwise

As often happens when a woman is approaching forty, Miss Robinson was "about twenty-eight", and not without hope. Even her favorite fortune-teller couldn't see a suitor in the offing, but was anxious to keep a customer.

"Ha!" she said, her eyes on the crystal, "I see a tall man. He's going to propose to you."

"Dark?" fluttered the excited client.

"Yes," said the fortune-teller, "it will have to be."

"Father was delighted when I told him you were a poet."

"I'm glad to hear that."

"Yes, the last of my boy friends he tried to kick out of the house was a boxing champion."

"These are hard times for actors, laddie."

"They certainly are. I must say you're looking very seedy, old chap."

"Seedy? I am so seedy I tremble every time I pass a canary."

"I think it's disgusting that some comedians should earn twice as much as Cabinet Ministers."

"Oh, I don't know. After all taking them as a whole, they are funnier."

He bid high for the parrot, and finally it was knocked down to him. Paying over his \$50, he asked: "Does this parrot talk?"

"Who do you think was bidding against you?" the parrot inquired.

Meek little man to doctor: I think what's really bothering me is a pain in the neck. But I don't suppose there's anything I can do about her.

AIDE-DE-CAMP GENERAL—Gen. H. D. G. Crerar, who directed the first Canadian Army in its European campaign, has been appointed aide-de-camp general to Queen Elizabeth. Gen. Crerar served in the same capacity to the late King George VI.

SELECTED

Recipe

WHITE LAYER CAKE

2½ cups once-sifted cake flour
4 teaspoons Magic Baking Powder
¾ teaspoon salt
12 tablespoons shortening
1½ cups fine granulated sugar
¾ cup milk
1½ teaspoons vanilla
4 egg whites
Grease two 8-inch round layer-cake pans and line bottoms with greased paper.

Preheat oven to 350 deg. (moderate).

Sift flour, Magic Baking Powder and salt together three times.

Cream shortening; gradually blend in 1 cup of the sugar and cream well.

Measure milk and add vanilla; very gradually blend about a third of the milk into creamed mixture.

Beat egg whites until stiff but not dry; gradually beat in remaining ¼ cup sugar, beating after each addition until mixture will stand in peaks.

Add flour mixture to creamed mixture about a quarter at a time, alternating with three additions of the remaining milk and combining lightly after each addition.

Add meringue to batter and fold gently until combined.

Turn into prepared pans.
Bake in preheated oven 30 to 35 minutes.

HUGE TELESCOPE

A "radio telescope" 625 feet in diameter is being planned in Britain to record stars at present invisible through visual telescopes, the department of scientific and industrial research said.

Today is yesterday's pupil.

Manitoba Expects Big Tourist Trade

WINNIPEG.—Government officials expect tourists to Manitoba this year will be close to the province's permanent population—771,815.

An official of the provincial government travel and publicity bureau said that enquiries this year have been the highest in history. Last year Manitoba welcomed 710,000 visitors, most of them from the United States.

LUNCH BOX SANDWICHES

School lunch box sandwich ideas lacking? Try chopped hard-cooked eggs mixed with crumbled crisp bacon, seasonings and mayonnaise. Use between buttered slices of whole wheat, rye, or pumpernickle.

Radio Announcer Bit Off More Than He Intended

MUNDAN, N.D.—Radio announcer Jack Harris told his listeners he would do the laundry for whoever identified the author of the statement: "So much to do with so little time."

Mrs. Henry Hoppe phoned to say the quotation was that of Cecil John Rhodes, South Africa pioneer and the man whose will provided for Rhodes' scholarships.

Mrs. Hoppe is the laundress for the Mandan Training school and its 300 inmates and employees.

A porcupine cannot shoot its quills.

Looks pretty—Tastes pretty WONDERFUL!

Fruit Bread — made with New Fast DRY Yeast!

Don't let old-fashioned, quick-spoiling yeast cramp your baking style! Get in a month's supply of new Fleischmann's Fast Rising Dry Yeast—it keeps full-strength, fast-acting till the moment you bake! Needs no refrigeration! Bake these Knobby Fruit Loaves for a special treat!

KNOBBY FRUIT LOAVES

Scald 1½ c. milk, ¼ c. granulated sugar, 2 tsps. salt and ½ c. shortening; cool to lukewarm. Meanwhile, measure into a large bowl ¾ c. lukewarm water, 3 tsps. granulated sugar; stir until sugar is dissolved. Sprinkle with 3 envelopes Fleischmann's Fast Rising Dry Yeast. Let stand 10 minutes, THEN stir well.

Add lukewarm milk mixture and stir in 2 well-beaten eggs, ½ c. maraschino cherry syrup and 1 tsp. almond extract. Stir in 4 c. once-sifted bread flour; beat until smooth. Work in 2 c. seedless raisins, 1 c. currants, 1 c. chopped candied peels, 1 c. sliced maraschino cherries and 1 c. broken walnuts. Work in ¾ c. (about) once-sifted bread flour. Knead on lightly-floured board until smooth and elastic. Place in greased bowl and

grease top of dough. Cover and set in a warm place, free from draught. Let rise until doubled in bulk. Punch down dough, turn out on lightly-floured board and divide into 4 equal portions; cut each portion into 20 equal-sized pieces; knead each piece into a smooth round ball. Arrange 10 small balls in each of 4 greased loaf pans (4½" x 8½") and grease tops. Arrange remaining balls on top of those in pans and grease tops. Cover and let rise until doubled in bulk. Bake in moderate oven, 350°, about 1 hour, covering with brown paper after first ½ hour. Spread cold loaves with icing. Yield—4 loaves. Note: The 4 portions of dough may be shaped into loaves to fit pans, instead of being divided into the small pieces that produce knobby loaves.

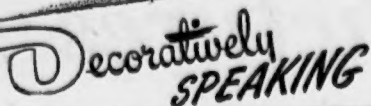

delicious INGERSOLL cheese

... gives you nutritious main courses at economy prices!

No need to cut down on main dish goodness just because prices are high! Start with a simple, inexpensive dish and let INGERSOLL BABY ROLL CHEESE add extra flavor and nutrition. Just see what a wonderful lift Ingersoll Baby Roll gives to omelets, hamburgers, grilled sandwiches ; ; ; to any dish where cheese can be used!

Let Ingersoll Baby Roll spark your main course menus two or three times this week. You'll find you're money in pocket and you're enjoying more delicious and varied meals than ever before! Be sure you ask for genuine INGERSOLL BABY ROLL.

STANDARD BRIDGE

On The Side : • By • E. V. Durling

How far can a dog swim? A woman living on Hayling Island, England, gave her spaniel to some friends on the mainland. The dog promptly returned home on the ferry. Then the dog was given to some other people living on another part of the mainland from which there was no ferry service. This was four miles by water from Hayling Island. A couple of days after he had been given away the second time, the spaniel arrived at his old home on Hayling Island soaking wet and vigorously wagging his tail. So his owner gave up trying to give him away. A dog expert, asked if a spaniel could swim four miles, said he could if he had "a strong urge to do so."

Miss Young was earnest on the matter of coiffure. "A man hates nothing more than dirty, stringy hair on a girl," she said.

In 1066 William the Conqueror made the last successful invasion of England.

Canadian Soldiers
Receive Welcome
In Korea by 'Rocky'

World News In Pictures

Dramatic Surgical
Operation Achieved
On Mid-Atlantic

ROCKY WELCOMES NEW ARRIVALS TO KOREA—Among Brig. J. M. Rockingham's last duties before leaving Korea for a visit to Australia and returning to new duties in Canada was to welcome newly arrived Canadians. Here commander of Canadian forces in Korea is seen at right having an informal chat with members of the 1st Battalion, Royal Canadian Regiment, during an inspection tour of Britannia camp. They are, left to right: Pte. John McCormick, 19, of Glace Bay, N.S.; Cpl. John Crockford, 32, of Toronto; Pte. Ronald Morley, 19, of Winnipeg, and Pte. Buster Clinkenboomer, 22, of Milliken, Ont.—Central Press Canadian.

EN ROUTE TO FAR NORTH FOR RESEARCH PURPOSES—Two men, young in years but old in the ways of the Arctic, are en route to Banks Island, 1,000 miles from the North Pole, where they will travel by canoe in a region unvisited by white man's ships for 100 years. To 40-year-old Tom Manning, (left), an Arctic advisor to the defence research board, and 20-year-old Andrew MacPherson, both from Ottawa, the journey will not be a new experience for them as the former has been going to the Arctic for the past 20 years, while the latter will be venturing into the far north on his fourth trip. In addition to studying the geology of the area for the defence board and collecting zoological specimens, the two explorers will test light rubber boots, seen above, that will take place of sealskin boots, during their six months' stay in cold north.

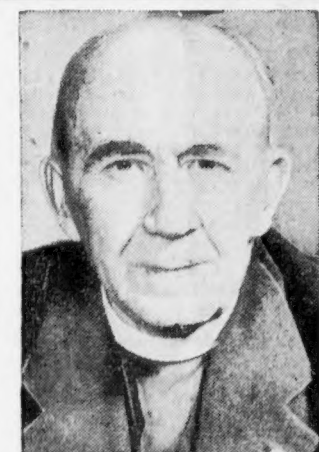

CUTE LIKE A FOX—These fox cubs, now a month old, are playmates of Dianne Guthrie, of Ancaster, Ont. Dianne's parents, Mr. and Mrs. K. A. Guthrie, recently received a gift of five fox cubs, and right now they're wondering what to do with the little fellows.

A COG IN THE NATO DEFENCE MACHINE—Just one of many cogs in the NATO defence machine, this 70-year-old man, an expert lathe operator, is known to workmates as "Father Christmas" (Pere Noel) at the factory of the Societe Nationale de Constructions Aeronautiques du Sud-Est, in Marseilles, France, turning out parts for the French jet fighter "Mistral", which is being supplied to NATO defence forces. This machinist is as important to the North Atlantic Treaty organization as any man who drives a tank, pilots a plane or mans a gun. "Father Christmas" got his name because his birthday is Dec. 25.

ON GOODWILL TOUR—Doctor Leopold Figl, Chancellor of Austria, is seen shortly after he arrived at Idlewild Airport, N.Y., following a visit to England. In the United States on a goodwill tour, Dr. Figl told reporters there is little or no chance of communism developing in Austria.—Central Press Canadian.

NAMED NEW ANGLICAN ARCH-BISHOP OF ONTARIO—Armed with the new title of Metropolitan Archbishop of Ontario Anglicans, which he received in Toronto, the Right Rev. Robert John Renison, of Timmins, Ont., will once again venture northward toward those he has championed through nearly half a century. The new Archbishop has come a long way from Tipperary where he was born 76 years ago. Fifty years of that time he has spent carrying God's word along the Hudson Bay shores to the 105,000 dwellers in the vast diocese of Moosonee. He began his Christian work among the Oblates and the Crees around the Hudson Bay area as a missionary in his early 20's. In later years he served as Bishop of the Athabasca in the Peace river country and Bishop of Moosonee.—Central Press Canadian.

DRAMA ON STORMY ATLANTIC—While the steamship Nova Scotia, en route to Boston, Mass., from England, was in mid-Atlantic, buffeted by a raging storm, a dramatic appendectomy was successfully performed on eight-year-old Carol Arthur of North Wales, England, by Dr. H. Alan Jones, a British surgeon who was a passenger on the vessel. When it became obvious that only surgery would save the life of the youngster, suddenly stricken with appendicitis, Dr. Jones ordered two kitchen tables lashed together, and with photo floodlights furnishing the illumination, the emergency operation was successfully completed. Above the dramatic scene is unfolded with a stewardess as anaesthetist-assistant. Below 29-year-old doctor is shown with his patient following the operation.

SCIENCE SEEKS TO CONTROL MOSQUITO MENACE—Experiments are now underway at Dominion Parasite laboratory at Belleville, Ont., whereby radio-activity is being used to determine the natural enemies of mosquitoes. Thousands of mosquito larvae, collected this spring from a swamp, have been treated with radioactive phosphorus and scattered in the swamp to allow them to be eaten by predators which in turn will become radioactive. They will then be collected and their radioactivity determined. Those with the highest amount will be propagated for dispersal in swamps to keep the mosquito menace greater in check. Above, Hedley James, agriculture research officer, is seen using microscope in experimental work while assistant Mary Wilkinson looks on.

FIRST AID

First Aid is just what the two words imply, namely the earliest possible intelligent aid or help given to the victim of an accident or sudden illness. This aid is usually of a temporary nature only, to be given at once, at the scene of the accident or sudden illness and before a doctor is available to assume responsibility.

Types of Wounds And Their Care

Wounds are caused by external violence and are classified as follows:

Contusions (Bruises)

These are caused by a blow or fall. The skin is not broken but may be swollen, reddened and tender to the touch.

The tissue beneath the skin is also swollen because of bleeding from small blood vessels which have been broken. In some instances a larger blood vessel is torn and the bleeding is profuse forming a pool of blood beneath the skin.

In a few days the colouring matter of the blood will stain the skin a purplish black.

Infection from outside contamination does not occur.

First Aid—A small bruise requires no care.

An extensive bruise, especially if swelling rapidly from deep bleeding, will be controlled by bandaging firmly and resting the part by splinting, and if possible applying cold compresses.

Abrasions (Scrapes)

These are shallow or superficial wounds caused by a scraping or rubbing of the skin surface (brush burns).

Typical of these wounds are the scrapes produced by a fall while running and landing on the knee or palm of the hand.

The surface of the skin is scraped but the whole thickness of the skin is not penetrated. Bleeding is usually not severe but often there is much dirt (clinders) ground into the wound.

These wounds are liable to local, superficial infection.

First Aid—As soon as possible after the injury wash the wound and the surrounding skin thoroughly with warm water and soap. Cover with a sterile or clean dry dressing and bandage firmly.

Incised Wounds (Cuts)

These are inflicted by a knife, glass or other sharp edge.

The edges of the wound are smooth and the surrounding tissue suffers little or no damage.

The wound may be shallow involving the skin alone, or may be deep with cutting of muscles, blood vessels, nerves or even opening into a joint or other cavity. These wounds bleed freely according to the size and depth of the cut and the number and size of severed blood vessels.

First Aid—A small cut may be allowed to bleed as this washes the wound from within out.

Apply a sterile or clean dressing and bandage firmly. Elevate the part if possible.

In deeper and larger incisions the blood loss may be rapid and alarming and demand immediate attention.

Incised wounds will heal promptly if the edges are brought together, if they do not become infected. They should be dressed and bandaged firmly and kept at rest.

Incisions of large size or depth should receive the early attention of a doctor.

Lacerated Wounds (Tears)

These may be small, as in tears from a barbed wire fence, or large and serious as from the fragments

of a bursting shell in war, or fragments of metal or stone resulting from an explosion.

The tissues are torn apart and severely damaged. Bleeding is not so profuse as in incisions unless large blood vessels are divided in which case they may bleed freely.

Foreign material (cloth, fragments of wood, metal, rock) is frequently driven into the wound.

A severely lacerated wound is apt to cause a serious state of "Shock". These wounds often do not heal readily and may leave large scars.

First Aid—Small lacerated wounds should be thoroughly washed clean. Apply a sterile dressing and bandage firmly.

For large wounds, control the bleeding, combat shock, and gently remove any foreign material which is seen and appears to be loose, but do not probe the wound. Apply a large dressing, bandage firmly and splint the area if at all possible. Send for a doctor.

Alberta Has More Than 3,000 Oil Wells

EDMONTON. — Alberta now has more than 3,000 oil wells, the petroleum and natural gas conservation board reported.

The board, in a report for the week ended May 15, said there were 3,003 wells in the province compared with 2,222 at May 7, 1951.

The Redwater field has 909 wells but the more-widespread and rapidly expanding Leduc field has 900 wells and may be the leader soon.

Weekly Tip

WILTED VEGETABLES

Wilted vegetables can be revived by soaking them in cold water containing a little salt for a short time before using.

Prejudice is the reason of fools.

World Happenings Briefly Told

Beavers taken to Windermere, B.C., last fall to conserve fishing by raising lake water levels have wintered well. The Rod and Gun Club now figures on bringing more beaver in this year.

Industrial expansion in the last 10 years, largely responsible for a 33 per cent. population increase in Prince Albert, has brought in 15 new industries employing 2,000 workers.

The British Government says it will sell any Japanese property in its hands and present the proceeds to Britons held as prisoners-of-war by Japan in the Second World War.

The ordinary public may be allowed for the first time to see the London Stock Exchange in operation. If an application for a building licence is accepted, the public will be admitted to a glass-enclosed gallery during business hours.

Britain's smallest television camera gave a demonstration of banking by television. From a vault in a London suburb the camera televised documents on a small screen in the bank's headquarters 10 miles away. There officials were able to check figures and verify signatures.

"Royal Journey", the film made by the National Film Board of Canada during the tour of Queen Elizabeth and the Duke of Edinburgh through Canada and the U.S. last fall, has completed a record-breaking run in New York. More than 50,000 saw the film, which ran for nine weeks.

The house of Garrard — crown jewelers to Britain's royal family for two centuries — is going out of business. The Queen now will have to authorize a new royal warrant for another crown jeweler so regalia can be prepared for her coronation in June, 1953.

DEFINES SANDWICHES

FORT WORTH, Tex.—This definition of sandwich turned up in a call by the city of Fort Worth for bids on feeding city jail prisoners:

"A sandwich shall be construed to mean two slices of bread with the food specified between the said slices."

Referring to bacon and egg sandwiches: "The bacon shall be of sufficient length to reach from one side of the slice of bread to the opposite side of the slice."

The Sports Clinic

(An official department of Sports College)
Conducted by Lloyd "Ace" Percival

Find Your Style of Hitting

The first important point to find out after you have perfected your swing is whether nature designed you to be a "power" hitter or a "choke" hitter. A "power" hitter usually holds the bat at the end of the handle. He swings with everything he has and always tries to hit the ball hard, depending on power and strength to gain him hits. He goes for the fences and figures he can get the ball through the infield because it is hit too hard to block. "Power" hitters are usually big, heavy men with strong shoulders and arms.

A "choke" hitter usually holds the bat fairly well up the handle, takes a short step into the ball and uses a quick, short swing. He is usually a smaller, lighter player and he depends more on timing and "place" hitting to get results. Instead of using power and strength to get the ball out of the infield he, to quote Willie Keeler, a famous "choke" hitter, "Hits 'em where they ain't." The "power" hitter usually steps well into the ball and hits early, the "choke" hitter usually waits until the last fraction of a second and then swings.

Both types of hitting are equally important. The "power" hitter hits more home runs, triples and two-baggers but the "choke" hitter usually has a better batting average and is more dependable. A "choke" hitter is harder to fool with a curve or trick delivery because he watches the ball longer and swings later. The best way to discover the style for which you are best suited is to test your skill at both. While making your test you will learn the two systems and this is all to the good because you never know when this all-around skill will be a big help. When making up your mind as to what style you will use don't forget to take into consideration your build and strength and which style you like best.

Keep Sideways to the Net

This is one of the most important fundamentals of good tennis but unfortunately it's one that few players make a habit of following. This is

bad because it's almost impossible to hit the ball with any real power, accuracy and punch unless you are standing sideways to the net when you make your stroke. So, don't forget—when hitting a forehand make sure your left side is toward the net, and when playing a backhand make sure your right side is toward the net.

How Much Sleep Should Athletes Get?

The amount of sleep that an athlete should get when he is in training depends a great deal on the athlete. Some thrive on seven or eight hours of sleep, while others need nine or ten hours. Another consideration is age. If under 18 an athlete, generally speaking, needs ten hours of sleep. Athletes older than this need a minimum of eight to nine hours.

So, if you are to replenish your body through proper sleep, try to get to bed at the same time and get up at the same time as often as possible.

Another point to remember is that you can get too much sleep, and this will make you loggy and slow-moving.

The new series of coming Sports College publications will be available to Sports College members only. To save time later on, send in your application for membership now. Remember, membership is absolutely free. To join, send a note to Sports College, Box 99, Toronto 1, Ontario.

PERFECT CONTAINER

The egg is packaged in one of the most perfect containers . . . the egg shell. Man with all his ingenuity has never invented one any better. However, like most containers it can be damaged. Should the shell become cracked and it is desired to hard-cook the egg, sprinkle salt in the water in which the egg is to be cooked and the egg white will not seep out.

WRITE A LETTER HOME

You think you are too busy to take time to write

A letter to a loved one far away.

The world and its pursuits are pressing you sore

That there isn't a moment left to spare in your day.

Yet your loved one is waiting to hear just one word;

To know that you are happy and well.

The hours pass so slowly with no letter from you.

If you're sick or in trouble, she cannot tell.

No news may be good news for some folks I know;

But for a mother this never will do. So, though you are busy, send a letter right away

And let her have some cheery news from you.

Lake Superior, with soundings of 1,290 feet, is the deepest of the Great Lakes. 2987

PRISCILLA'S POP—Reading From Right to Wrong

—By Al Vermees

Women Fill Vital Jobs As North Grows

PRINCE ALBERT, Sask. — The Canadian northland today no longer is strictly a man's world. There are women radio operators, teachers, trappers, prospectors, road-camp cooks, nurses and stenographers handling desk work for northern development.

The radio operator at Stony Rapids, 470 miles from Prince Albert, is Mrs. O. B. McNeill. She operates a monitor station, one of seven in Saskatchewan, which relays messages to smaller stations usually in charge of field officers in the north.

Other wives of field officers also take their turn at delivering information from the outside world, operating the radio while husbands are away.

All northland nurses are called "doc" by the metis. They do not confine their work to office hours. They often travel 20 or even 50 miles by dog team or canoe to care for their charges.

On these mercy calls they are usually accompanied by R.C.M.P. constables and Indian guides.

Typical was the journey of pioneer Saskatchewan government nurse Myrtle Pearce when she came from a big city five years ago to serve the Cumberland House district.

She arrived at The Pas, Man., during spring breakup. No boats were expected and aircraft could not land on stormy waters. But she gathered her belongings and headed for the river bank.

She hitched a ride in a small boat piloted by a northern trapper. They made a three-mile portage before Stony Rapids was reached. From there nurse Pearce was flown to Cumberland House.

The duties of a northland nurse include inoculations, vaccinations, midwifery and even the operation of a dispensary.

Northern teachers aid elder pupils, many of them nearing 40 and 50 years of age, in basic English. One teacher, Miss Marie Lalonde, is stationed at Saskatchewan's most northerly outpost, Camell Portage, 470 miles north of Prince Albert.

Marie is one of three white women at the post and is the only single girl. Her pupils include 19 metis and two whites.

Long journeys over northern Saskatchewan trails have become common experiences for another veteran of the north, Curly Hanson. The red-haired Mrs. Hanson has tended trap lines with her husband for many years.

She has also become an expert in northern culinary arts. She has recipes for delicious dishes of muskrat and beaver and she claims that for a real treat caribou is hard to beat.

Stories of northland adventure, beside which other frontier tales seem pale, can be told by the teenage Studer girls, Berna and Joan, daughters of a veteran prospector.

SLAUGHTER OF WILD FLOWERS

We are not among those who say hands entirely off the wild flowers. Somehow we have the idea that the flowers grow to bring pleasure, to be taken home in small bouquets to grace a sick room, or to bring pleasure to an older person who no longer can walk out among them.

But we do resent the slaughter of the flowers; the manner in which many, including many adults, snatch them out of the ground, tearing roots, grabbing large numbers, letting them die on the way home through want of a little care. Many are to be found cast off along the path, pathetic little torn bouquets.

Few people think to leave a few leaves on the plant so that it may breathe and continue to live.—Owen Sound Sun-Times.

Smile Of The Week

"Dad, what is a traitor in politics?"

"A traitor, my son, is a man who leaves our party and goes over to the other side."

"Then what is a man who leaves the other party and comes over to our side?"

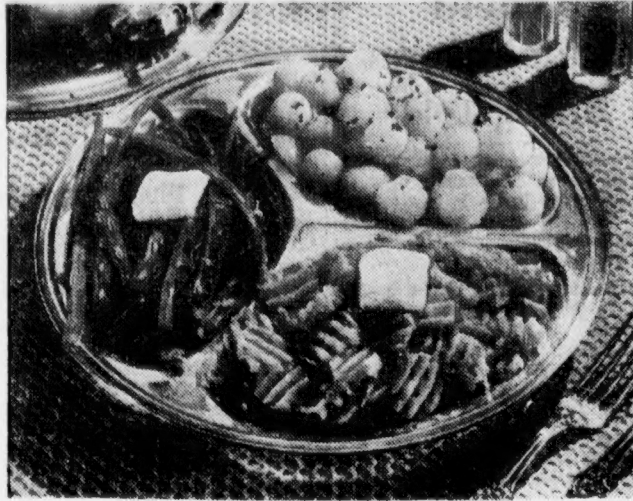

"A convert, my boy."

ANSWERS TO QUICK QUIZ

ANSWERS: 5. In 1923. 3. 336. 1. Almost every home has a garden. 4. No, about two fifths is exported. 2. 30 years.

(Material supplied by the editors of Quick Canadian Facts, the hand-book of facts about Canada.)

::: APPETIZING RECIPES :::

Beans, the versatile vegetable, can be cooked and served in so many different ways to add variety and food value to any meal. Here we have green bean strips, carrots cut in lacy circles and tiny potato balls.

Beans with Onions

For 1 lb. beans, use ½ lb. small onions, 4 tbsp. butter, ¼ cup water and 1 tsp. salt. Peel the little onions and leave them whole. Melt the butter in a pan, add the onions and cook very slowly for 10 minutes. Watch carefully and turn them over three or four times. Add the beans, boiling water and salt. Cover and cook for 12 or 15 minutes or until all are tender.

All of the recipes for beans may be used with fresh, frozen or canned beans, cutting the cooking time accordingly for frozen or canned varieties.

String Beans with Celery

Prepare 1 lb. string beans "French style," and cut a stalk of celery in pieces as nearly as possible the same size and shape as the beans. Combine them in a

heavy saucepan with 3 tbsp. butter and stir them over the heat for 2 minutes. Add ½ cup of chicken stock, or water, and cover, allowing the vegetables to cook for five minutes, gently. Then cook for another 4 minutes without the cover. Both vegetables should have a crispness about them, and a special flavor. Good with chicken or fish.

Green Beans with Parsley

Cook the beans, cut either Julienne, or frenched, in the smallest amount of water possible. Watch them so that they do not overcook and lose both character and color. Drain. Melt butter in the pan and toss the beans in it until they are glossy and well heated through. Sprinkle with a little chopped parsley, salt and pepper.

WHICH IS THE PHONEY?

Suppose you want to buy a teapot. Of course, you want one that will do its job properly and not masquerade as something entirely different.

A casual survey of many medium priced china and household wares departments is likely to depress you by the quantity of items offered for sale which are generally ugly, gaudy in colour, and in the design of which little thought has been given to function and beauty.

The two tea-pots shown, photographed by the Canadian Association of Consumers with the co-operation of the National Gallery of Canada, are illustrations of a well and a badly designed article.

One is round in shape, which is natural to pottery making. It has a long spout with a good pouring lip. The lid is simple and well secured.

The other tea-pot resembles someone from an old ladies' home! You are certain to be thoroughly disgruntled before many days go by when the spout has lost its function and no longer pours well; the lid is apt to tip off easily for it is not balanced properly; it is also difficult to clean.

Dozens of such examples of ugly, non-functional articles are being manufactured for household use and are finding their way into Canadian homes. More often they prove more costly and less efficient than the plain, honestly designed article.

"If women would select only well-designed articles which will function properly, they could discourage manufacturers from foisting on the consumer such household horrors," comments Mrs. W. R. Walton, Jr., National President of the Canadian Association of Consumers.

Helpful Hints

To save leftover paint for retouching, cover the paint with a coating of paraffin as you would jelly. It will not dry out, and the paraffin can be easily removed when you need the paint.

A torn section of linoleum will last longer if scotch tape is applied to cover the tear and a coat or two of fresh, white shellac is used over the tape.

Non-washable shades can be cleaned by rubbing common salt over them. Rub well into the shade with a soft cloth, and this will renew their freshness.

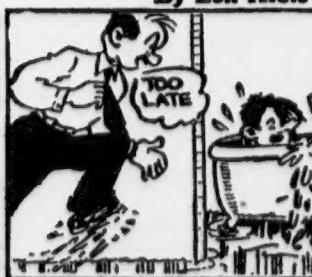

Before painting lumber, give any knots in the wood a preliminary coat of shellac. Knots contain resin and pitch which will sooner or later seep out to mar your paint job. Shellac will seal and prevent this leaking.

Quick Canadian Quiz

1. Is there any agriculture in the Yukon and Northwest Territories?
2. What is the minimum age for a Canadian senator?
3. How many knit goods mills are there in Canada?
4. Do Canadians use all the sawn lumber produced in the country?
5. When was Canada's last bank failure?

GARDEN NOTES

Right Now Is Good Time To Plan Better Garden Next Year

Sure You Can Plant

Aside from things like grass, sweet peas and nursery stock, which should get established before the really hot weather, one can go on planting regularly right up to early July in most parts of the country. Expert gardeners who want to get the most out of their land, indeed, make a regular practice of sowing a few rows of beets, carrots, beans, corn, and such things every fortnight up to the end of June or even into July. If we give these late gardens a little extra cultivation, a little watering and possibly some quick-acting commercial fertilizer they will come along fast and mature in plenty of time before frost.

When It Gets Hot

The wise gardener will change his methods a bit when the days turn

hot. With the lawn he will cut less frequently, certainly no oftener than once a week, and he will usually let the clippings lie where they fall to form a bit of protecting mulch. He will also set his mower a little higher so that the grass is not cut so short.

In the flower and vegetable garden, even if no weeds have been allowed to grow, he will continue a light cultivation once a week or every ten days, to create what is known as a dust mulch which will prevent evaporation of moisture from the soil.

Before going on holidays it is an excellent plan to go over flower and vegetable gardens lightly with a cultivator then, if possible, mulch lightly with grass clippings or similar material to conserve the moisture. If necessary and possible one should water thoroughly the night before this final pre-holiday cultivation.

A Good Time To Plan

From now right through to fall is an excellent time to look around and make notes for the bigger and better garden we are going to have next year. It's an excellent idea to keep a note-book and list certain things we are going to have for sure next year. We should jot down such items as color and season of bloom, height, resistance to disease and drought and, of course, the name of anything we see growing in a neighbor's garden that we hope to have in our own.

With certain lines of nursery stock, most shrubs, trees, vines, etc., one can buy and plant in the fall just as well as next spring. By doing this we get these established earlier and save time for other jobs next year.

IN ALBERTA

Big Army Camp Most Modern

WAINWRIGHT, Alta. — Hardened war veterans would blink with astonishment if they could see the modern Wainwright military camp, a self-contained little "city" 130 miles east of Edmonton.

Days of the leaky hut and the sagging bunk are gone forever from the vast, 140,000-acre training ground.

Soldiers at Wainwright spend their days in modern quonset barracks equipped with air conditioning, fluorescent lighting, controlled heating, rubber-tile floors and all the comforts of home—even some comforts you don't find in a home.

What soldier of even recent service would have dreamed of going to a training camp where he would have a swimming pool, bowling alleys, gymnasiums, a specially-constructed theatre, shopping centre, tennis and badminton courts and baseball and softball diamonds.

These are some of the things which will be available for the 5,000 men who will train at the camp this summer.

In the last 12 months, 60 new buildings have been constructed on the training ground at a cost of nearly \$8,000,000.

A hospital has been expanded from little more than an aid centre to a fully-equipped, 96-bed institution.

Protestant and Catholic chapels are under construction.

ODDITIES In The News

Frederick Perrin, 30, of Andover, England, was killed in this Hampshire town when a rabbit ran in front of his bicycle and became caught in the spokes.

A Hoboken bank employee at Jersey City, N.J., has turned down a \$300,000 trust fund that would yield him \$9,000 a year. But he won't say why. The will of Miss Rhoda Kuhlmann, 49, stipulated that John H. Schmidt was to receive the \$9,000 a year income from the trust fund.

Wives of tea garden laborers living in a slum area near Margherita, India, have formed a union to bring "overbearing" husbands under control. The wives decided collectively to punish any husband who beats his wife.

An umbrella left in an airliner from Paris at the London airport was returned to its owners the same day. The owner's name: Walter Rain.

The word "gazette" comes from "gazetta," the term for a coin used in medieval Venice to pay for news bulletins posted in the city. 2987

Patterns

Transfer Designs In Three Colors

by Alice Brooks

TWENTY-FOUR motifs in color! Old-fashioned girls and little nose-gays in soft pink, blue and green. Iron them on—no embroidery needed! Washable—use them on towels, sheets, pillowslips, all linens. Just add ready made eyelet for edging! Pattern 7230 has 24 three-color motifs from 1x2 to 4½x10 inches.

To obtain this pattern send twenty-five cents in coins (stamps cannot be accepted) to:

Exciting! Our 1952 edition of Alice Brooks Needlecraft Book! Brimful of new ideas, it's only twenty-five cents. NINETY-ONE illustrations of patterns of your favorite needlecraft designs, plus SIX easy-to-do patterns printed right in the book.

OUR COMPLETE SHORT STORY —

I Cover The Police Courts

By SAMUEL CAMPBELL **Some People Just Don't Like Their Names in Newspapers.**

WHEN I opened the door of my room and flipped on the light switch, I got a glimpse of the fat man sitting in a chair. He must have had a silencer on the gun because I only saw two bright flashes. And then I sank to my knees. Somewhere in the back of my mind I was fondly wishing I had stuck to short story writing and kept my nose out of this screwy business. I cover the police courts. Yeah! Right now I'm covering six feet of this hospital bed.

It all began when the journalism bug bit me. I thought I could write. So I went to the city editor of the newspaper and asked for a job. He assigned me to the police beat. I've been on it three years. And brother, if you're seriously thinking about writing as a career . . . but that's all beside the point. The character you want to know about is the fat man and why he used me for target practice.

On the morning of the day I was shot, I was sent to cover a narcotics story. For a while it was just routine stuff. Officers of the morality squad had caught the accused, a Jap-Canadian named Surika, hiding \$50,000 worth of opium in the rafters of his garage. But the trial didn't go on. The fat man, Arthur Poole, acting on behalf of Surika, asked for an adjournment of one week. He said he wanted time to get Surika a proper counsel and an interpreter. The court granted the adjournment and freed Surika on \$3,000 bail . . . which the fat man paid. Then they

both left together.

Well, there was nothing unusual about that. It happens every day in the courts. So I wrote the story up and went on with the next job. By noon hour I had quite forgotten the fat man and Surika until I was going down the city hall steps to lunch. Suddenly the fat man came out of an alcove where he had been waiting for at least two hours, threw away his cigarette, coughed nervously and lumbered over to meet me. I saw he had something in his hand . . . money, I presumed. That was the usual approach. They say what respectable citizens they are and what a disgrace it would be to have their names appearing in a newspaper story—especially a court case. Well, that's exactly what Mr. Poole did, and I brushed him off the same as the rest.

In the late afternoon, things were pretty slack. I got thinking again about the fat man and the Jap. There might be a human interest story somewhere in this set-up, so I looked up Surika's address and started out.

He lived in a poor section of the suburbs in a wartime house. His history showed that he drank heavily and that his wife had left him about a year ago. No mention was made of the fat man or how he got tied up with him.

When I got there, it was raining slightly and getting dark fast. Just as I alighted from the rear door of the bus, I could have sworn I saw Poole getting on the front door. The collar of his trench coat was turned up and he was carrying a parcel . . . something wrapped up in newspapers. The bus pulled away quickly and I didn't get much of a look.

I went up to Surika's front door and rang the bell. No answer. "He must be around somewhere!" I thought to myself, "if Poole just left a few minutes ago." I went around to the side door. No luck there. Then I happened to glance down the yard towards the garage. There was no light on, but one door was slightly ajar. When I drew closer, I heard a car engine idling quietly.

"Surika! Surika!" I called out twice, but there was no answer. When I went in, I found out why. Surika was slumped over the steering wheel . . . dead! All the doors and windows were closed up tight. It looked like another of those carbon-monoxide "accidents". And it might have passed for one if I hadn't

—Central Press Canadian.

HONEST CLERK — A forgetful customer sent a pair of pants away to be cleaned by an establishment in Winnipeg and in so doing forgot to remove \$475 in cash which had been stowed away in one of the pockets. Upon discovering the money, Mrs. Hedwig Dennis, a clerk in the store, telephoned the customer long distance in Riverton, Man., who promptly came in and picked cash up.

seen the fat man leaving in such a hurry.

I broke a window in Surika's kitchen and got inside to a phone. I told the police where I was, what had happened, and who I had seen boarding a bus. Then I phoned in my story to the paper and went home.

I think this is where you came in. Remember the two flashes and the silencer on the gun? I dropped to the floor like a sheet of lead. The first slug went past me; the second grazed my left temple and knocked me out cold. But the fat man didn't get away. For even while I was on my way home on the bus, Homicide had secured a lead on him. They tailed him to my apartment and came in just behind me. He tried to shoot it out, but came out second best.

Just before he died, he signed a confession stating that he was the chief of the dope ring. Surika was only a small-time agent. That afternoon he had went to the Jap and asked for more opium. When Surika refused and threatened to expose him, the fat man knocked him out, propped him up in his car, closed the windows and left the motor running. Why he came to my place and took his wrath out on me, I'll never know. I guess some people just don't like having their names printed in the newspapers.

BLUE BONNET Margarine is sold in regular economy package with color wafer, also in the famous YELLOW QUIK bag for fast, easy color.

Census Figures Show Manitoba's Biggest Age Group Is 25 To 34

OTTAWA. — Manitoba has more people between the ages of 25 and 34 than in any other age group, according to dominion bureau of statistics 1951 census figures released.

Of the province's 776,541 people, 120,780 are between 25 and 34. Next largest group is the 35-44 group with 105,984.

Groups and totals are (0-4) 89,977; (5-9) 72,594; (10-14) 60,143; (15-19) 57,188; (20-24) 58,752; (25-34) 120,780; (35-44) 104,984; (45-54) 78,852; (55-64) 66,803; (65-69) 27,347; (70 and over) 20,121.

A Piggy Bank

HOLSTEIN, Ont. — . . . And this little piggy became a bank. Art Bell, a truck-driver, lost a wallet containing \$90 while loading pigs on a farm near this village 35 miles south of Owen Sound. He looked in the pigpen to find a few scraps of chewed paper and a contented looking pig.

Sound travels about 1,100 feet a second. 2987

THE TILLERS

—By Les Carroll

: Western Briefs :

Some Fast Painting

EDMONTON.—A Canadian house-painting record was set here. Fifty Edmonton painters covered 1,200 square feet on a duplex bungalow in eight minutes and 18 seconds. The previous record was set last year in Winnipeg where a house was painted in 10 minutes and 32 seconds. The stunt was arranged by the Junior Chamber of Commerce to advertise beautification week.

Probably a Record

EDMONTON.—A probable record was established here when Edward Hole graduated from the University of Alberta. He became the ninth member of one family to graduate from the same university. Eight brothers and sisters preceded him. All are the children of Mr. and Mrs. Harry Hole of Edmonton.

Sheep Industry Threatened

VICTORIA, B.C.—Bands of killer dogs who have slaughtered up to 60 sheep in one night are threatening the British Columbia sheep raising industry with extinction, Wallace Gunn, provincial livestock commissioner, said.

Oil From Tar Sands

EDMONTON.—Hon N. E. Tanner, mines minister of Alberta, announced that the Swedish Shale company intends to go ahead with experiments for a new process in extracting oil from the tar sands deposits 250 miles northeast of Edmonton.

Tornado Hits Alaskan Town

FAIRBANKS, Alaska. — A small tornado roared through the suburban

community of Graehl near Fairbanks, Alaska, tearing roofs, tossing automobiles and scattering debris throughout the area. There were no reports of injuries.

Reduce Village Taxes

SEDGEWICK, Alta.—Village councillors here set a tax rate of 47 mills, down one mill from last year, including 22 mills for schools. The decrease was possible because of a reassessment completed during the past year.

Cat 20 Years Old

VICTORIA, B.C.—Qui Qui, Manx cat owned by Mr. and Mrs. Frank Hughes, now is in its 20th year, equivalent to 140 years for humans. Qui Qui is in good health but spends most of the time under the kitchen stove.

Not On Menu

WINNIPEG.—Mrs. Rita Johnson had an unexpected extra course on her breakfast table recently. The entire ceiling collapsed, knocking her to the floor and spraying her two sons with fragments. They were not injured. A fire threat was averted when workers cut gas and power lines broken in the fall.

Do You Know That . . .

When water has been heated to the boiling point (212 F.) the temperature cannot be raised no matter how much heat is applied, as long as the steam is allowed to escape.

Phosphorous matches came to America in 1836.
